Gap (GPS)	Nike (NKE)	Abercrombie Fitch (ANF)	Harley-Davidson (HOG)
Exxon Mobile (XON)	Verizon (VZ)	Panera Bread (PNRA)	FaceBook (FB)
General Electric (GE)	AT&T (T)	Papa Johns (PZZA)	

- Each student spends **about** \$10,000.00 for each stock.
- Pick 10 different companies (from this list or choose/research your own companies)
- Divide \$10,000.00 by the current stock price.
- *See Example: below for Buying \$10,000.00 of Dominos. DPZ is trading at \$148.09. Round the stock price to \$148.00*
- $10,000.00 \div 148 = 67.56$ (round to the nearest whole number)
- **I or you can buy 68 shares of Dominos stock**
- Use the same formula for the other 9 stocks you want to buy
- $(10,000.00 \div \text{current stock price}) = \text{number of shares I can buy}$
